

1. The SSN is wrong on the credit report and was never furnished from me.
2. The pennymac mortgage was opened simultaneously with mis-matching real name, social security number, disclosures, and account information. The welcome letter, note, deed of trust have incorrect loan numbers are not the original. The FHA assignment is missing and there is a different loan number.
3. The student loans were in deferment, and the balance was decreasing and suddenly increased to match the amount of the incorrect mortgage and have been closed on the other bureaus
4. The pennymac loan and the note and loan were not in the abstract filed in the county, yet there are two assignments from themselves to themselves with mis-matching real name info and never show one from sovereign where it was originated.
5. A HELOC was opened and the equity was exhausted into another investor mortgage. It is evidenced by the credit report that was denied with the reason being that the DTI was too high, yet a commercial line of credit was applied for. Not a HELOC.
